Academic Training

DURATION	ORGANIZATION	ROLE
June 2015 to April 2016	Web Informatic Software Solution	Android Developer Trainee

Academic Project Undertaken

Project: Android Based Advertisement Management System

Team Size: 4

Front End: Android, Java

Back End: MySQL

Project Description: Advertising is any paid form of non-personal communication about an organization, product service or idea by an identified sponsor. Nowadays the major problem in advertisement world is we have to go for different platforms for different kind of advertisement for our product. But in our system, we provide a platform that integrates all the ways of advertisement like Newspaper, TV, Radio, Cinema, Banner, Hoardings, Vehicle, and Internet etc. This system provides all kind of information like advertisement tracking, money spent in different fields means a generated form of reporting and the facility of generating the bill of particular customer. So, there is no need to go for different platforms for different types of advertisement so the customer are very attracted with this system because it is the platform to publish an advertisement in different fields very easily.
